

cataPulp®

BRITISH DISTORTION

WAMPLER®

Of all the British amps that are famous for their roar, which is the most distinctive and has the most personality?

The world famous Orange Amplifiers® have been part of the history of great rock music for as long as we can remember - bringing a strong and forceful character that will make your tone as distinctive as only one amp can.

When looking at the tones available from these amazing amps, Brian took several of their most famous tones and worked tirelessly to replicate them from this pedal. With a powerful 3 band active EQ and a gain sweep that can give you everything from modern country crunch to all out screaming metal, the cataPulp is the ONLY pedal available that will give you that from your rig.

If your riffs are tiny or dark, or anyone of your Verbs need to be Rocking, the cataPulp is the pedal to take you there.

In order to get the best out of your new pedal, we recommend you spend some time getting to know the controls as well as understand how they all work together. This pedal is one of the most versatile single channel distortion pedals available today so please get familiar with it.

Bypass Switch – A true-bypass soft touch relay switching footswitch that completely bypasses the signal when the pedal is off.

Volume – This control adjusts the output level of the cataPulp. There's plenty of volume on tap, so whether you want to go farther than your input level or just make sure it can do unity volume (the same level of signal going out as you feed it, when active), you're covered. Please be aware that when you increase the gain and/or the any of the EQ controls it could affect the overall output level of the pedal, so you may have to balance the volume accordingly.

Gain - This controls how overdriven/distorted your guitar signal is when it leaves the pedal. Fully counter clockwise will be no "dirt" and full clockwise will turn your tone into a screaming demon. We suggest that you start off around 9 o'clock and then dial more in and listen to how it affects the tone and character of the required distortion. You will probably find that once you balance the 3 band active EQ properly with your tone you won't need as much gain as you thought you would!

Bass - Controls the amount of bass you can take away or add to the signal. We recommend you start this at noon and then see where it takes you, adding low end can make your tone really fat or muddy - half the fun is finding that ultimate sweet spot to make your tone have that 4x12" roar!

Mid Range - Like the bass control, this control allows you to add or takeaway mid range from the tone. You can make the pedal sound really 'scooped' and heavy with this or really honking and powerfull across the mids. Remember, if your natural tendency is to boost the bass and highs to give a scooped tone, trying taking out some middle first, you will get a much more of a pure tone with all the character you want!

High - This, of course, allows you to add or take away the high end from the signal. So, you can be as sparkly and sharp as you want to be, and as unsparkly and unsharp also!

Suggested Settings (volume to suit)

Getting Hairy...

Adding a bit of grit and fatness to your guitar's natural tone...

Whoa, that's heavy!

Heavy crunch with modern scooped mids...

Visiting Beverly Hills

Full on gain, you might say it'll make you sound like you are Wheezering...

Man of Iron

Bassy and fuzzy, just perfect for those heavy riffs.

WAMPLER Pedals Limited Warranty. WAMPLER offers a five (5) year warranty to the original purchaser that this WAMPLER product will be free from defects in material and workmanship. A dated sales receipt will establish coverage under this warranty. This warranty does not cover service or parts to repair damage caused by accident, neglect, normal cosmetic wear, disaster, misuse, abuse, negligence, inadequate packing or shipping procedures and service, repair or modifications to the product, which have not been authorized by WAMPLER. If this product is defective in materials or workmanship as warranted above, your sole remedy shall be repair replacement as provided below.

RETURN PROCEDURES. In the unlikely event that a defect should occur, follow the procedure outlined below. Defective products must be shipped, together with a dated sales receipt, freight pre-paid and insured directly to **WAMPLER SERVICE DEPT - 3383 Gage Ave., Huntington Park, CA 90255, USA.** A Return Authorization Number must be obtained from our Customer Service Department prior to shipping the product. Products must be shipped in their original packaging or its equivalent; in any case, the risk of loss or damage in transit is to be borne by the purchaser. The Returns Authorization Number must appear in large print directly below the shipping address. Always include a brief description of the defect, along with your correct return address and telephone number.

When emailing to inquire about a returned product, always refer to the Return Authorization Number. If WAMPLER determines that the unit was defective in materials or workmanship at any time during the warranty period, WAMPLER has the option of repairing or replacing the product at no additional charge, except as set forth below. All replaced parts become a property of WAMPLER. Products replaced or repaired under this warranty will be returned via ground shipping within the United States freight prepaid. WAMPLER is not responsible for costs associated with expedited shipping, either to WAMPLER or the return of the product to the customer.

INCIDENTAL OR CONSEQUENTIAL DAMAGE. In no event is WAMPLER liable for any incident or consequential damages arising out of the use or inability of the possibility of such damages, or any other claim by any other party. Some states do not allow the seclusion or limitation of consequential damages, so the above limitation and exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

FOR YOUR PROTECTION. Please complete the online warranty registration within (10) ten days of the date of purchase so that we may contact you directly in the event of a safety notification issued in accordance with the 1972 Consumer Product Safety Act.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantees that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experience radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty to operate the equipment.

CUSTOMER SUPPORT. Our dedicated staff is ready to help you with any warranty or product questions - please email us at help@wamplerpedals.com or call us on (765) 352-8626. Please remember to register your pedal as soon as possible after purchase at the following web page to ensure quicker service if you should ever need to make a warranty claim:
