

# TUMNUS<sup>®</sup>

## DELUXE

# WAMPLER<sup>®</sup>

BUILT IN USA

I'm guessing you've seen the prices of some of the vintage effect pedals on eBay these days? Certain pedals are literally going for several thousand dollars - why? Well, because they sound AMAZING and they have a myth and a legend attached to them - which of course it helped all the more by a healthy amount of PCB goop and them not being made like that anymore...

There have been many clones of the most popular, many that claim to bring you the original parts used in the original way, recreating something magical, even going so far as recreating outer paint color to distinguish models. Here's the thing, we ALL know that each of these pedals were different, it had nothing to do with the paint or any mysterious secret part change, it had everything to do with what the designer felt worked best at that moment in time, for that pedal. We decided that enough was enough, we got frustrated with people charging hundreds of dollars for a copy that claimed to contain the magic fairy unicorn dust NOS parts, and decided it was time to put this to rest!

Brian took several of the original and designed the Tumnus to sound like the best bits of all of them, make the ultimate tribute to that circuit - and make it with modern high quality parts so each sounds as amazing as the next! With the original Tumnus appearing only in a mini format, people were shouting for a full sized version - So, Brian being Brian, decided he wouldn't just put it in a bigger box, he wanted more gain, he wanted the option of true bypass or buffered and, of course, a full 3 band EQ. The Tumnus Deluxe was born...

Whether you want to use this pedal as an OD or a boost, you can be sure that all of the low end is present, and beautifully warm, the mid hump is placed perfectly and the gain itself is to on point you will finally understand what all the hype has been all about. With that as your foundation, you can now have THAT tone, but with total control... sounds like heaven in a box!

In order to get the best out of your new pedal, we recommend you spend some time getting to know the controls as well as understand how they all work together. This kind of circuit is the most responsive around, and you can get so many tones from it... it's really worth spending lots of time playing with it and see what it does. Try it as a boost with the gain down or as a OD pedal with the gain up, it just makes everything sound better!

**Bypass** - as you have come to expect from Wampler, the bypass switch is a relay based soft switch, this ensures the pedal will be the most hardwearing it possibly can be! There is a switch on the side, labelled 'buffer', when pushed in the pedal is 'buffered bypass' and when out, it's fully 'true bypassing'. The buffer in the Tumnus is outstanding, so the choice is yours which way you want to play it!

**Gain** - Quite self explanatory! This adds grit and dirt to the effected signal. Start with it all the way off (counter clockwise) and up the volume from unity and you have an amazing boost, it will fatten up your tone remarkably... When you bring the gain control up the glorious thickness this pedal is famous for appears - as a stand alone boost, overdrive or pre gain boost, this is the key to finding you tone.

**Level** - You guessed it, this is where the level comes from. You will probably want to start at an equal volume to it bypassed, unity. You'll probably be surprised that this is much lower than other OD pedals, this is because one of the features of this pedal is the headroom in it to act as a pre gain boost.

**Bass / Mids / Treble** - In true Wampler style, Brian added a much more comprehensive EQ stack to the Deluxe. The treble control is the same as the classic Mini Tumnus, and is joined with fully active Bass and Mid control. Start with the bass and mids at noon, find the tone you like and then start to take away or add the others, you'll be amazed it what this can do for tone!

## Suggested Settings

### That classic K tone

Dial this in and go take the family on a nice holiday!

### High gain and juicy

When you want to make your HB guitar go from growl and roar

### Hot Strat bite

Taking your S style guitar and giving it some bite

### Single coil snarl

Giving your single coil guitar that famous bite, and then some.

**WAMPLER Pedals Limited Warranty.** WAMPLER offers a five (5) year warranty to the original purchaser that this WAMPLER product will be free from defects in material and workmanship. A dated sales receipt will establish coverage under this warranty. This warranty does not cover service or parts to repair damage caused by accident, neglect, normal cosmetic wear, disaster, misuse, abuse, negligence, inadequate packing or shipping procedures and service, repair or modifications to the product, which have not been authorized by WAMPLER. If this product is defective in materials or workmanship as warranted above, your sole remedy shall be repair replacement as provided below.

**RETURN PROCEDURES.** In the unlikely event that a defect should occur, follow the procedure outlined below. Defective products must be shipped, together with a dated sales receipt, freight pre-paid and insured directly to **WAMPLER SERVICE DEPT - 3383 Gage Ave., Huntington Park, CA 90255, USA.** A Return Authorization Number must be obtained from our Customer Service Department prior to shipping the product. Products must be shipped in their original packaging or its equivalent; in any case, the risk of loss or damage in transit is to be borne by the purchaser. The Returns Authorization Number must appear in large print directly below the shipping address. Always include a brief description of the defect, along with your correct return address and telephone number.

When emailing to inquire about a returned product, always refer to the Return Authorization Number. If WAMPLER determines that the unit was defective in materials or workmanship at any time during the warranty period, WAMPLER has the option of repairing or replacing the product at no additional charge, except as set forth below. All replaced parts become a property of WAMPLER. Products replaced or repaired under this warranty will be returned via ground shipping within the United States freight prepaid. WAMPLER is not responsible for costs associated with expedited shipping, either to WAMPLER or the return of the product to the customer.

**INCIDENTAL OR CONSEQUENTIAL DAMAGE.** In no event is WAMPLER liable for any incident or consequential damages arising out of the use or inability of the possibility of such damages, or any other claim by any other party. Some states do not allow the seclusion or limitation of consequential damages, so the above limitation and exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

**FOR YOUR PROTECTION.** Please complete the online warranty registration within (10) ten days of the date of purchase so that we may contact you directly in the event of a safety notification issued in accordance with the 1972 Consumer Product Safety Act.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantees that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experience radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty to operate the equipment.

**CUSTOMER SUPPORT.** Our dedicated staff is ready to help you with any warranty or product questions - please email us at [help@wamplerpedals.com](mailto:help@wamplerpedals.com) or call us on (765) 352-8626. Please remember to register your pedal as soon as possible after purchase at the following web page to ensure quicker service if you should ever need to make a warranty claim:
