

WAMPLER Pedals Limited Warranty. WAMPLER offers a 5 year warranty to the original purchaser that this WAMPLER product will be free from defects in material and workmanship. A dated sales receipt will establish coverage under this warranty. This warranty does not cover service or parts to repair damage caused by accident, neglect, normal cosmetic wear, disaster, misuse, abuse, negligence, inadequate packing or shipping procedures and service, repair or modifications to the product, which have not been authorized by WAMPLER. If this product is defective in materials or workmanship as warranted above, your sole remedy shall be repair replacement as provided below.

RETURN PROCEDURES In the unlikely event that a defect should occur, follow the procedure outlined below. Defective products must be shipped, together with a dated sales receipt, freight pre-paid and insured directly to WAMPLER SERVICE DEPT - 5300 Harbor Street, Commerce, CA 90040, USA. A Return Authorization Number must be obtained from our Customer Service Department prior to shipping the product. Products must be shipped in their original packaging or its equivalent; in any case, the risk of loss or damage in transit is to be borne by the purchaser. The Returns Authorization Number must appear in large print directly below the shipping address. Always include a brief description of the defect, along with your correct return address and telephone number. When emailing to enquire about a returned product, always refer to the Return Authorization Number. If WAMPLER determines that the unit was defective in materials or workmanship at any time during the warranty period, WAMPLER has the option of repairing or replacing the product at no additional charge, except as set forth below. All replaced parts become a property of WAMPLER. Products replaced or repaired under this warranty will be returned via ground shipping within the United States freight prepaid. WAMPLER is not responsible for costs associated with expedited shipping, either to WAMPLER or the return of the product to the customer.

INCIDENTAL OR CONSEQUENTIAL DAMAGE In no event is WAMPLER liable for any incident or consequential damages arising out of the use or inability of the possibility of such damages, or any other claim by any other party. Some states do not allow the seclusion or limitation of consequential damages, so the above limitation and exclusion may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and the receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty to operate the equipment.

FOR YOUR PROTECTION Please complete the online warranty registration within (10) ten days of the date of purchase so that we may contact you directly in the event of a safety notification issued in accordance with the 1972 Consumer Product Safety Act.

CUSTOMER SUPPORT Our dedicated staff are ready to help you with any warranty or product questions - please email us at help@wamplerpedals.com or call us on (765) 352-8626. Please remember to register your pedal as soon as possible after purchase at the following web page to ensure quicker service if you should ever need to make a warranty claim:

WAMPLER
BUILT IN USA

Tom Quayle: Dual Fusion
Quick Reference Guide

Dual Fusion

The Dual Fusion pedal from Wampler Pedals is, we think, the first overdrive pedal specifically voiced to the new breed of fusion guitarists – but it's so versatile it can find a place on ANY board of ANY genre.

The first dual overdrive pedal specifically voiced to the new breed of fusion guitarist who loves a tight yet organic type of overdrive tone. There are two independent overdrive circuits (channels) in one enclosure. Each one as independent controls over it's respective circuit. There are two inputs and two outputs that will correspond with each channel of the pedal.

Volume: Controls the total output volume for that channel.

Tone: This adjusts between a bassier sound at the fully counterclockwise position, to more treble sound when turned fully clockwise. Each channel has an independent tone control.

Gain: This control adjusts the total amount of gain that is applied to the signal path. Turning the Gain control clockwise will increase the amount of gain in the circuit. Each Channel has an independent gain control.

Smooth/ Fat Switch: The "smooth" setting has a bit more compression and is smoother than the "fat" setting. This setting is the one Tom Quayle prefers because of its warmth and response. "Fat" has a volume boost, has less compression, but is more open and dynamic. This switch only controls Channel 1.

Throaty/ Natural Switch: The "Throaty" setting will give you a bit more rounded sound while the "Natural" setting is a bit more organic and open sounding. This switch only controls Channel 2.

Order: Change the channel stacking order with this switch if you are using only one input and output cable (input via ▼ on Channel 1 and output via ▲ on Channel 2).

Connections: This pedal has 2 pairs of input and output jacks: if you are using only one set connect to the jacks marked with solid triangles; if you are using both sets, the outline triangles indicate the separate output for Channel 1 and input for Channel 2. This allows you to connect both channels independently (e.g. to a loop switcher), insert a pedal between the channels, or run in stereo.

Power: This pedal was designed around the usage of a 9V or 18V DC power source and is intended to sound its best at 9V. To avoid damage to the pedal, do not exceed 18V DC, do not use center pin positive adapters and do not use AC power. Using an incorrect power adapter can lead to damage and will void the warranty on the pedal. This pedal draws 17mA (at 9 Volts) and 20mA (at 18 Volts).
