DS Character: Adjust between Bright (Left) and Dark (Right).

OD Character: Adjust between Normal (Left) and Hard Clipping (Right).

Order: Adjusts the order that the channels run into each other - Left position is OD into DS, Right position is DS into OD.

Power: This pedal was designed around the usage of a 9-18V DC power source.

To avoid damage to the pedal, do not exceed 18V DC, do not use center pin positive adapters, and do not use AC power.

Use only a 9-18V DC power source that is intended for guitar pedals.

This pedal draws approximately 30mA at 9V and 30mA at 18V.
